Introduction

In this case Dr Minion turned himself into the Purdue Police after shooting Prof. Natasha Kremlin in her Office of Knoy Hall of Technology. EMS was able to get to Nastsha before she had died, she sustained injuries, but they were not life threatening. Before taking Nastsha to the hospital Purdue Police had seized her mobile phone for evidence.

After it was determined that Dr. Minion was a Major in the Airfare Reservers 434 Wing and he was released to Airfare OSI and they took custody of him. Dr. Minion was on assignment to Purdue as a Research Scientist, who had access to classified information relating to Cybersecruity research and National Cyber Defense strategies. OSI took over the lawful authority of Dr. Minions devices, cloud accounts and social media accounts with credentials.

Natasha Kremlin voluntarily gave access to her cloud and social media with credentials. The lead investigator Agent Smith also found out that Dr. Minion stated he had betrayed his country and had given classified and expert control restricted information related to his research to Russians. Dr. Minion was not willing to answer more questions pertaining to his spying for the Russians. Natasha had admitted that she was really a Russian spy but had refused to say anything more about the matter. All the evidence given to us for this class will be listed below.

Evidence Number	Date/Time	Person	Description

Statement of Opinions

Frank Minion shot Natasha with a Glock 19 G5. The two GRAs were involved with spying and reported their findings to Boris Kremlin. Natasha broke into Frank's home and later went on to poison his coffee. Frank Minion should be charged with treason and attempted murder. While we think that Frank's circumstances were unfortunate, there are also so many other avenues Frank could have taken to avoid this situation. He acted out of greed and revenge. Throughout the report, there will be more than enough pieces of evidence to show why Frank should be charged.

Overview

1. Who is involved?
Frank Minion, Natasha Kremlin, Boris Kremlin, Tina Money
2. Are there any accomplices?
Gun dealer, GRA's
3. Is there evidence on the device(s) that can place Dr. Minion at the crime scene at the date and time in question?
There are two pictures of a body lying on the ground in Knoy Hall on February 23, 2023 in Dr. Minion's phone
4. Is there evidence on the devices that can confirm that Dr. Minion was in possession of a Glock 19 G5 and 9mm ammunition (gun used to shoot Kremlin)?
Yes there are pictures on Dr. Minion's phone showing 9mm ammunition and email conversations discussing the purchase of a Glock 19
5. Is there evidence on the devices that can confirm or refute Dr. Minion's claim that he was fearful for his life as the victim (Kremlin) had attempted to kill him by poisoning him?
Yes there is email conversations between Natasha and Boris that confirmed that she broke into Frank's home and poisoned Frank's coffee.
6. Who was involved in the spying activities, and what roles did they play?
The GRA's could be a set-up and be working with Natasha. Kremlin was the head of this mission. Natasha must have poisoned Frank.
7. What classified and export control information was compromised, and who was involved?
Department of Defence Research
8. Where and when did the classified and export control information exchange occur, and who was involved?
There was an exchange between Natasha, Boris and Frank at the Rosen Shingle Creek hotel in Orlando at noon on February 15, 2023
9. What was the motivation for Dr. Minion to engage in spying?
Dr. Minion had a gambling problem and owed his bookie \$50000. Dr. Minion also felt pretty unappreciated from the Colonel.
10. What is the timeline of events?
See appendices
11. In your opinion should the suspect (s) be charged with a crime (is there enough evidence to support the charge(s))?
Yes

Analysis

For finding out who was involved in the case we used Magnet Axiom, and Cellebrite UFED Report Reader. To find out that Boris was involved we used Magnet Axiom to examine Frank's Google Takeout email's between him and Boris to see that Boris was the one orchestrating all the events. Natasha was found out being involved through the use of Cellebrite and reading the message strings between her and Frank.

The accomplices in the case were found out through the use of Magnet Axiom and Cellebrite again. To find out that Frank had bought the gun used to try and take Natasha's Kremlin's life, we used Magnet Axiom to examine Frank's Google Takeout emails. Reading through Frank's emails we found a string of emails between Frank and a gun dealer named Daneel Olive. The emails showed that Frank had bought a gun from him that was seized from Frank after turning himself in. The other accomplices in this case were the Graduate Research Assistant that was assigned by Natasha Kremlin and Boris. Through examining emails from Natsha's google takeout it was found that the GRA's assigned to Frank's research were Russian spies that Natsha and Boris wanted assigned to the research to have insider knowledge.

The evidence gathered for supporting that Frank was at the crime scene on February 23, 2023 was retrieved through using Cellebrite to examine Frank's UFED Reader Report File. In the report file there was a photo of Natasha Kremlin who appeared to be laying on the ground dead. The photo had a time stamp of 2/23/2023 3:07:37 PM which places him at the crime scene on the date he had turned himself in to authorities. As well, the Latitude and Longitude associated with the photo on Frank's phone is the same as the Latitude and Longitude for Knoy Hall of Technology.

We used Cellebrite to look through Frank's phone. We noticed a picture of the 9 mm ammunition that is used on the Glock 19 G5. We also used Frank's uploaded Google Takeout on Magnet Axiom to look at his emails. We found email correspondence between Frank and his gun dealer, Daneel, to purchase the Glock 19 G5.

We used Cellebrite to look through Frank's messages. We noticed that Natasha had given him a cup of coffee on February 20, 2023. Later on the same day Frank sends a text to Natasha, confronting her about poisoning him.

We uploaded Natasha's iTunes backup to an application called iphonebackupextractor. We found a message sent to Frank requesting access for GRA's to view Frank's research. Looking through Natasha's phone's image on Magnet Axiom, we noticed a few emails between her and Boris Kremlin where she mentioned the GRA's involvement with spying on Frank's

work. We also noticed that Boris Kremlin had sent Natasha a package to “deal” with Frank, thus implying her involvement in Frank’s poisoning.

We uploaded Frank’s Google Takeout through Magnet Axion and looked through his Google Drive. On Frank’s Google Drive, there’s a folder titled DoD Research that contains different reports pertaining to his research with the Department of Defense.

We used a forensics tool called Cellebrite to look through the conversations on Frank’s phone. After looking through his text conversations with Natasha, we noticed that on February 14, 2023 he had set up a meeting with Natasha at Rosen Shingle Creek .

We used a forensics tool called Cellebrite to look through the conversations on Frank’s phone. We noticed Frank and Natasha’s texts and on February 2, 2023 Frank mentioned how he didn’t feel appreciated by the Colonel after their meeting. He also mentioned on February 6, 2023 that he owed his gambling bookie a lot of money.

Supporting data

1. Who is involved?
Frank Minion, Natasha Kremlin, Boris Kremlin, Tina Money
2. Are there any accomplices?
Gun dealer, GRA's
3. Is there evidence on the device(s) that can place Dr. Minion at the crime scene at the date and time in question?
See Figures 19, 20
There are two pictures of a body lying on the ground in Knoy Hall on February 23, 2023 in Dr. Minion's phone
4. Is there evidence on the devices that can confirm that Dr. Minion was in possession of a Glock 19 G5 and 9mm ammunition (gun used to shoot Kremlin)?
Yes there are pictures on Dr. Minion's phone showing 9mm ammunition and email conversations discussing the purchase of a Glock 19
See Figures 16, 17, 18
We used Cellebrite to look through Frank's phone. We noticed a picture of the 9 mm ammunition that is used on the Glock 19 G5. We also used Frank's uploaded Google Takeout on Magnet Axion to look at his emails. We found email correspondence between Frank and his gun dealer, Daneel, to purchase the Glock 19 G5.
5. Is there evidence on the devices that can confirm or refute Dr. Minion's claim that he was fearful for his life as the victim (Kremlin) had attempted to kill him by poisoning him?
Yes there is email conversations between Natasha and Boris that confirmed that she broke into Frank's home and poisoned Frank's coffee.
See Figure 11, 12, 13, 14
We used Cellebrite to look through Frank's messages. We noticed that Natasha had given him a cup of coffee on February 20, 2023. Later on the same day Frank sends a text to Natasha, confronting her about poisoning him.
6. Who was involved in the spying activities, and what roles did they play?
The GRA's could be a set-up and be working with Natasha. Boris Kremlin was the head of this mission. Natasha must have poisoned Frank.

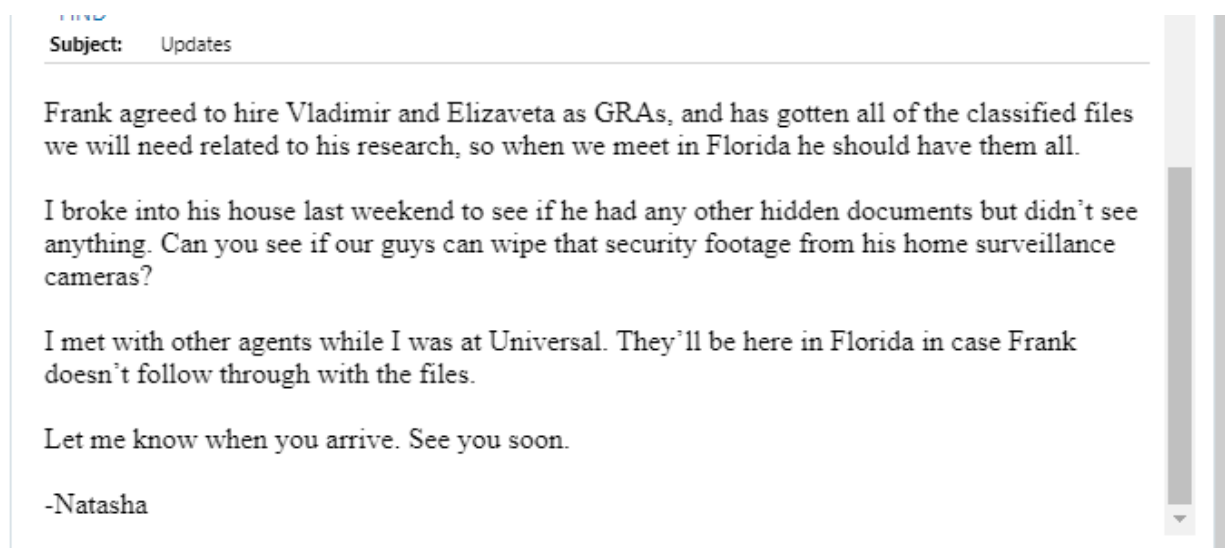

Figure 0.0

Also see Figure 2, 5, 7, 10

We uploaded Natasha's iTunes backup to an application called *iphonebackupextractor*.

We found a message sent to Frank requesting access for GRA's to view Frank's research.

Looking through Natasha's phone's image on Magnet Axiom, we noticed a few emails between her and Boris Kremlin where she mentioned the GRA's involvement with spying on Frank's work. We also noticed that Boris Kremlin had sent Natasha a package to "deal" with Frank, thus implying her involvement in Frank's poisoning.

7. What classified and export control information was compromised, and who was involved?

Department of Defence Research

We uploaded Frank's Google Takeout through Magnet Axiom and looked through his Google Drive. On Frank's Google Drive (as seen on Figure 21), there's a folder titled DoD Research that contains different reports pertaining to his research with the Department of Defense.

8. Where and when did the classified and export control information exchange occur, and who was involved?

There was an exchange between Natasha, Boris and Frank at the Rosen Shingle Creek hotel in Orlando at noon on February 15, 2023

See Figure 8, 9

We used a forensics tool called Cellebrite to look through the conversations on Frank's phone. After looking through his text conversations with Natasha, we noticed that on February 14, 2023 he had set up a meeting with Natasha at Rosen Shingle Creek for the next day (February 15). Boris was also there.

9. What was the motivation for Dr. Minion to engage in spying?

Dr. Minion had a gambling problem and owed his bookie \$50000. Dr. Minion also felt pretty unappreciated from the Colonel.

See Figure 1, 3, 6

We used a forensics tool called Cellebrite to look through the conversations on Frank's phone. We noticed Frank and Natasha's texts and on February 2, 2023 Frank mentioned how he didn't feel appreciated by the Colonel after their meeting. He also mentioned on February 6, 2023 that he owed his gambling bookie a lot of money.

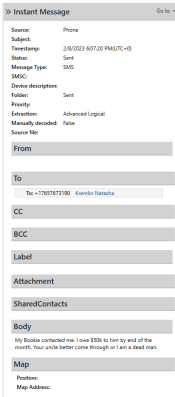

10. What is the timeline of events?

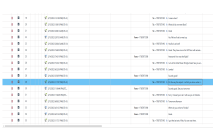

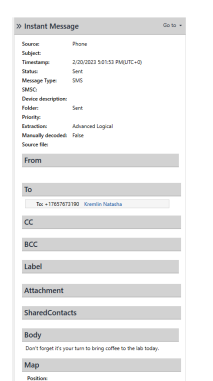

See appendices

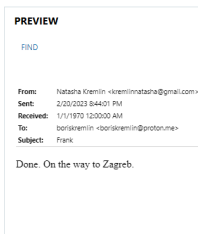

Appendices

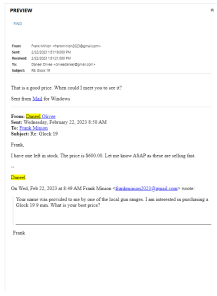

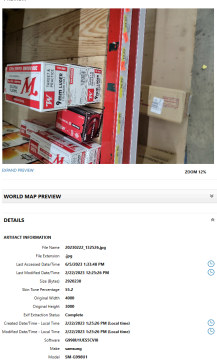

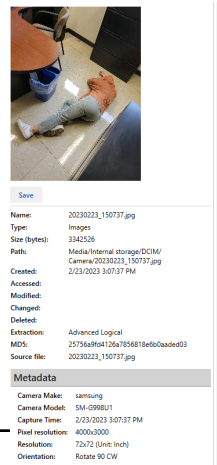

If the photos in the appendix are not clear enough there is a photo dump after the appendix that shows more clear screen captures of the evidence. The photodump can be easily searched by using ctrl+f and searching up Figure ID [x] with x being the respected ID number.

Frank agreed to hire Vladimir and Elizaveta as GRAs, and has gotten all of the classified files we will need related to his research, so when we meet in Florida he should have them all.

I broke into his house last weekend to see if he had any other hidden documents but didn't see anything. Can you see if our guys can wipe that security footage from his home surveillance cameras?

I met with other agents while I was at Universal. They'll be here in Florida in case Frank doesn't follow through with the files.

Let me know when you arrive. See you soon.

-Natasha
